

From Michelle Waryk

Walk on Water Ministries, aka..Walk on Water Equine Assisted Therapy is an outstanding and dedicated organization. The entire staff is caring and attentive to all ages of riders who come to experience the joy and love of riding and learning about horses. I have personally watched over the years, many children smile and experience immense joy when up on a horse. Whether the rider has special needs or not; the horses are gentle and easy to ride for all levels. The staff is attentive to safety at all times.

My daughter started riding and attending the summer camp when she was 5 years old, before a family trip to Montana, just so that she would be more comfortable on horseback. She has continued to attend every summer camp/bible study for the past 7 years. She looks forward to riding the same horses and to meeting all the new rescued horses that have been helped by those associated with Walk on Water Ministries. She has learned not only to love riding, but also has learned about the work and dedication involved in the care of these animals. She wants to share what she has learned by volunteering with the organization. This example speaks volumes that someone who grew up with the services of this organization, now wants to volunteer there.

I would highly recommend this organization as a safe and secure place with a staff dedicated to promoting the love of horsemanship at all levels. I pray that this organization continues to provide the community with a symbol of God's love through the use of their horses.
